**PURCHASED POWER COST
ADJUSTMENT (PPCA) SCHEDULE**

The Purchased Power Cost Adjustment shall consist of two basic parts, as follows:

Part 1 = Revenue Requirement Factor

Part 1 makes provisions to recover annual and frequent fluctuation in operation and maintenance costs, annual administration costs, net non-operating revenues, contributions to the General Fund in lieu of taxes, electrical system bond payments, electric system extensions, improvements and additions, and other expenses and subsidies to other funds which are assessed against the Electric Fund.

Part 2 = Wholesale Power Cost Adjustment (WPCA)

Part 2 provides a method which may be utilized by the City to react to fluctuations in wholesale power costs.

An "Extra Revenue Requirement" will be calculated by subtracting the "Base" Purchased Power Costs (\$0.0472 x Total KWH Purchases), from the actual wholesale purchased power costs.

The monthly Wholesale Power Cost Adjustment is then calculated by dividing this "Extra Revenue Requirement" by the next month's estimated KWH sales (excluding lights and other fixed billing loads). This monthly Wholesale Power Cost Adjustment will be rounded to the nearest \$0.0001 per KWH.

There will be a true-up amount each month applied to the "Extra Revenue Requirement", to account for the difference between actual and estimated KWH sales. However, if the City chooses not to pass along extra calculated charges, or credits, for a given month, then there will be no "true-up" amount the following month.

Stated by formula, the Wholesale Power Cost Adjustment (WPCA) is as follows:

$$WPCA = [(APP - BPP) + T] / S$$

APP = Actual total Purchased Power costs associated with its bulk power supply.

BPP = "Base" Purchased Power costs (\$0.0472 X Total KWH Purchases).

T = True-up amount calculated monthly to account for difference between actual and estimated KWH Sales.

S = Estimated monthly KWH Sales (excluding lights and other fixed billing loads).

Additional connection fees will be charged for every two additional commodes in the business unit. A unit is the entity that is performing business in a said space and carries a City business license to conduct said business applications.
